

NAME

poof — List or remove Mac OS X packages

SYNOPSIS

poof *package-id*

DESCRIPTION

The **poof** utility lists or removes Mac OS X packages in a low-level manner.

EXAMPLES

List packages (but skip from Apple):

```
./poof.py | grep -v apple
```

Remove package sketchbookexpressmac:

```
sudo ./poof.py com.autodesk.sketchbookexpressmac
```

BUGS

poof will not remove nonempty directories.
